

# PROTECTING WILDLIFE NEAR AND FAR

## BY BEING RESPONSIBLE PET OWNERS, WE HELP PROTECT LOCAL WILDLIFE

In Nepal, dogs can spread diseases, including rabies, to red pandas. The Red Panda Network works to vaccinate pets, working farm dogs, and free-roaming dogs to help keep red pandas healthy. **Here in Boise, you can help protect local wildlife by being a responsible pet owner when enjoying the outdoors.**

- Know the rules for each trail.

- Always clean up after your pet.

- Keep pets close to the trail to avoid erosion.

- Don't allow pets to hunt wildlife – especially ground nesting birds.

- Keep a close eye on your pet during critical times for wildlife – winter through early summer.
